

Help Us Shape the Future of Pet Cremation Operations in the Philippines

We Need Some Help From You

We are currently conducting market research with pet crematoriums across the Philippines to better understand how facilities are managing daily operations, accounting, and pet tracking.

Our goal is simple:

To gain insight into how crematories operate today — and where technology can better support your business.

We Are Interested In Learning:

- What software (if any) you use to:
 - Manage case intake and pet tracking
 - Handle accounting and invoicing
 - Coordinate scheduling and workflows
 - Manage customer communications
- Primary Business focus B2B or B2C
- Vet Hospitals - How do the hospitals let you know they have a pickup? How do you know the details of what needs to be picked up?
- Routing of drivers
- Operational challenges you face
- Areas where automation or reporting could help
- Opportunities for improving efficiency and service quality

Your experience and perspective are incredibly valuable to us.

As a Thank You

To show our appreciation for your time, we will send you an electronic Starbucks Gift Card via email after completing the interview.

Coffee is on us.

No sales pressure — just a conversation to better understand your business.

Participation Details

- Format: Short virtual interview (10–15 minutes)
- Confidential: Your responses will be kept private
- Appreciation Gift: Electronic Starbucks Gift Card emailed after participation
